Practical Issues *in* Thoracic Oncology *for the Clinician*

Objectives

- Based on current diagnostic and therapeutic modalities available for use in treating patients with thoracic disease, participants will apply new modalities when appropriate for patients.
- Evaluate critical elements of CT scan screening in order to determine appropriate diagnostic options for your patients with lung cancer.
- Examine the advantages and limitations in minimally invasive diagnostic staging techniques in order to determine treatment strategies.
- Apply management protocols for your patients presenting with indeterminate pulmonary nodule in order to improve outcomes.

TARGET AUDIENCE

This course is intended for physicians with an interest in recognizing new methodologies available to evaluate patients with suspected thoracic malignancy.

AUDIENCE RESPONSE

Audience participation and education will be enhanced by a wireless audience response system.
